

I3DION Spatial

Screen Wireframes & Screen Architecture Document

Version 1.0

Introduction

This document defines the complete screen structure, layout hierarchy, user navigation, and wireframe architecture for I3DION Spatial.

The goal is to establish a clear visual blueprint before moving into high-fidelity UI design and frontend development.

Screen 01 — Landing Page

Purpose

Introduce I3DION Spatial and convert visitors into registered users.

Final UI Blueprint

The I3DION Spatial screen architecture is designed around a simple principle:

Create Product → Create Catalog → Generate QR → Deliver Product Experience → Generate Leads.

Every screen, workflow, and interaction must support this journey while maintaining a professional industrial SaaS experience.
