

I3DION Spatial

UI/UX Flow & Experience Design Document

Version 1.0

1. UI/UX Vision

Design Philosophy

I3DION Spatial is not a traditional software dashboard.

It is an Industrial Product Experience Platform.

The user experience should focus on:

- Simplicity
- Professionalism
- Clarity
- Speed
- Mobile First Design

The interface should feel similar to modern SaaS products while maintaining an industrial and enterprise appearance.

Design Principles

Principle 1

Less clicks.

Users should reach AR experiences within 3 steps.

Principle 2

Mobile First.

Most QR scans happen on mobile devices.

Principle 3

Product First.

The product should always be the center of the experience.

Principle 4

Enterprise Feel.

Professional design suitable for industrial companies.

2. Design System

Primary Colors

Brand Blue

Used for:

- Primary Actions
 - Navigation
 - Highlights
-

Dark Gray

Used for:

- Headers
 - Sidebar
 - Enterprise Appearance
-

White

Used for:

- Backgrounds
 - Cards
-

Status Colors

Green

Success

Orange

Warnings

Red

Errors

3. User Flow Overview

``text id="uxflow" Landing Page ↓ Login / Signup ↓ Dashboard ↓ Product Management ↓ Catalog Builder
↓ QR Generation ↓ Customer Scan ↓ AR Experience ↓ Lead Generation

4. Landing Page

Purpose

Explain platform value and generate signups.

Hero Section

Content

Headline:

Industrial AR Catalog &
Sales Visualization Platform

Subheading:

Transform industrial product catalogs into interactive QR-powered AR experiences.

CTA Buttons

Primary:

Get Started

Secondary:

Watch Demo

Features Section

Cards:

Interactive Catalogs

QR Experiences

---

# 7. Product Management Flow

## Product List Page

Purpose:

Manage all products.

---

### Search

Search by:

- Product Name
  - Category
- 

### Filters

Published

Draft

Archived

---

### Product Card

Contains:

- Thumbnail
- Name
- Category
- Status

Actions:

Edit

Delete

Preview

---

## 8. Product Upload Flow

### Step 1

Basic Information

Fields:

- Product Name
  - Category
  - Description
- 

### Step 2

Specifications

Fields:

- Dimensions
  - Weight
  - Capacity
  - Technical Data
- 

### Step 3

Media Upload

Upload:

- Images
  - Videos
  - PDFs
  - GLB Model
- 

### Step 4

Animations

Select:

- Door Open

- Door Close
  - Custom Animations
- 

## Step 5

Publish

Product Preview

Publish Product

---

# 9. Catalog Builder

## Purpose

Create interactive catalogs.

---

## Catalog List

Shows:

- Catalog Name
  - Products Count
  - Status
- 

## Create Catalog

Fields:

- Catalog Name
  - Description
- 

## Product Selection

Add Products.

Drag & Drop Arrangement.

---

## Catalog Preview

Displays:

- Cover
  - Products
  - QR Links
- 

## Publish Catalog

Generate:

- URL
  - QR Code
- 

# 10. Product Experience Page

## Purpose

Customer-facing experience.

---

## Layout

```text id="prodexp" 3D Viewer + Product Details + Action Buttons

```
---  
  
## Sections  
  
### Product Name  
  
### Product Overview  
  
### Specifications  
  
### Documents  
  
### Media  
  
---
```

11. AR Viewer Experience

Purpose

Allow customers to place products in real environments.

## Final UI Definition

The UI/UX of I3DION Spatial must prioritize product exploration, sales enablement, and customer understanding. Every screen should guide users toward creating, sharing, experiencing, and interacting with industrial products through catalogs, QR experiences, and immersive AR visualization.
